

Instruction guide: IAS 2021 Knowledge Toolkits

This instruction guide provides an overview of how to navigate the IAS 2021 Knowledge Toolkits. IAS – the International AIDS Society – developed these toolkits as part of a core goal of investing in the HIV workforce by building the skills and knowledge that are needed to end the epidemic.

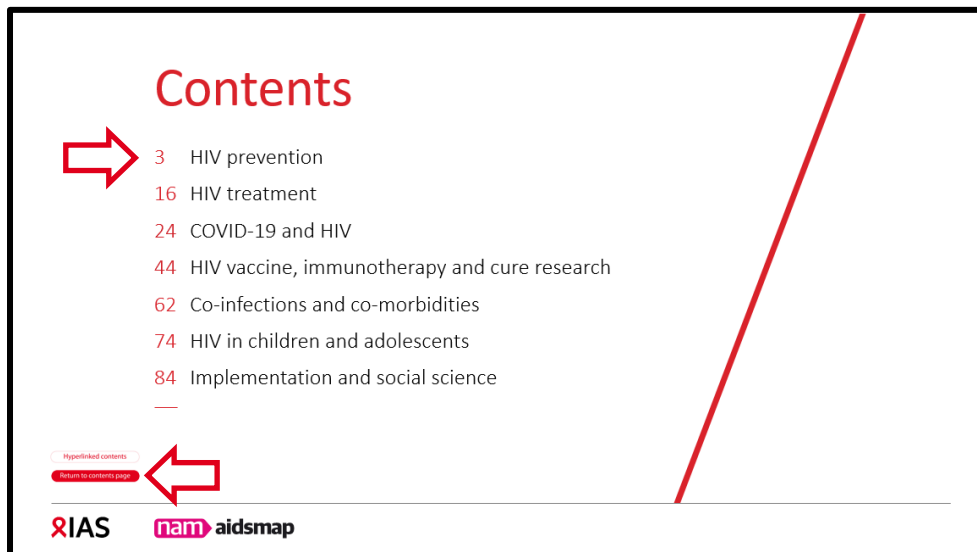

The full package offers toolkits created exclusively for IAS Members to access and best utilize the key science and research presented at IAS 2021 - the 11th Conference on HIV Science.

WHAT'S INCLUDED

Click on the link on the web page to automatically download the toolkits in form of PowerPoint presentation.

NAVIGATION

Once downloaded, this presentation has been designed to enable quick navigation to specific topic areas, studies, populations and more.

The 'Contents' slide is a pathway to all the topics covered in the knowledge toolkits. To view a specific topic, click on the text related thereto. You can always go back to the 'Contents' by clicking on "Return to contents page" on the bottom left corner of any slide.

The 'Overview' slide includes sections that link to specific topics within the presentation. Please note that all functions must be executed from the SLIDE SHOW mode. To return to the 'Overview' slide, click on "section start" on the bottom left corner of any slide. See example below.

HIV treatment

- ➔ 17 Islatravir + doravirine safety analysis
- 19 Injectable long-acting lenacapavir for first-line HIV treatment
- 22 Injectable long-acting lenacapavir and drug-resistant HIV
